MovieStar MS-100HCP

5.1 Home Cinema Pack

The MovieStar 100 HCP offers a no compromise solution for those who want a small, discrete loudspeaker system but refuse to tolerate the inadequate performance capabilities by such systems. It comprises 4 satellite speakers, a centre speaker and an active subwoofer. The centre channel and each satellite use an improved 3" full range driver and are made of ABS Plastic moulding, which ensures resonance-free music reproduction throughout. The MS-100 active subwoofer uses a 200mm bass unit driven by a built-in power amplifier with a rated output of 75W RMS and peak output of 150W.

The MS-100HCP's svelte, stylish, and modern design allows for ease of installation without any overbearing influence on your current interior, which means your living space can remain a place of style and comfort whilst providing a totally absorbing and adrenaline-fueled home cinema experience.
